

# Q & A:

## How do I find the serial # on my new Slant/Fin Boiler?

Your boiler's serial number can be found on the rating plate label. This label can be in different locations, depending on the model boiler you purchased. The metallic grey label has the name of the boiler in bold near the top of the label. The pictures below are samples of boiler rating labels. The serial numbers are circled in the locations they can be found. Not all models are shown, but rating plates are similar.

**If you can't locate the serial number, contact Slant/Fin at: 516-484-2600**
