

Quiet Efficiency. Easy as 1-2-3

\$100 REBATE
ON UP TO **3** Q3 BOILERS!

The 3-pass design is what makes the boiler extremely quiet and efficient!

Popular in large commercial boilers, this design maximizes heat transfer, increases efficiency due to increased surface area that the flue gasses come in contact with, and keeps it there longer. This results in low stack temperatures, indicating high efficiency. There is at least 6 lineal feet and at least 11 square feet of surface area to ensure generous heat transfer. A.F.U.E. is 87%. The extra room in the boiler passageways provides for thermal expansion of the flue gasses, making this boiler extremely quiet.

PLUS!
You'll get a FREE Q3 Sweatshirt on your 1st Q3 Boiler Purchase!

Purchase a Slant/Fin Q3 series 3-pass boiler from October 1, 2017 through December 31, 2017 and receive a \$100 rebate from Slant/Fin.
